

SSPA AREAS FOR IMPROVEMENT

Our personnel's experience in areas of implementation and the interrelation with staff involved in operational, administrative, and executive makes us an expertise company and prepared to develop areas for improvement to the SSPA System and thus achieve a successful system implementation.

SSPA AREAS FOR IMPROVEMENT

BFC Consulting focuses its implementation guidelines towards the unification of the various management systems of our main customer, PEMEX. Thereby helping to reduce document management for each of the systems and leverage relationships information processes to manage records in a single database of information without losing its independence and value, increased efficiency of those involved to optimize similar activities of systems and leverage continuous improvement for all management systems.
